

### REMARKS

Consideration of the above-identified application is respectfully requested in light of the above amendments and the following remarks. Claims 1-34 were in the international phase of the PCT application and were the subject of an objection based upon a lack of unity of invention. This preliminary amendment seeks to select the first grouping of claims (1-7) and to delete the remaining 4 groupings of claims (8-34). It is understood that this deletion is in no way related to patentability and that this preliminary amendment is without prejudice or waiver as to the Applicant's rights of later presentation of these and other claims.

An early action on the merits is respectfully requested.
